

Ayush Chaudhary
UG (IV Year II Semester)
B.Tech. (Metallurgical & Materials Engineering)
Contact No: 7800388590
Email: ayush_c@mt.iitr.ac.in
Registration No: 22118014/2026

Area of Interest

Data Structures & Algorithm, Web Development

Education

Year	Degree/Examination	Institution/Board	CGPA/Percentage
2026	B.Tech. 4th Year	Indian Institute of Technology, Roorkee	6.549
2021	Intermediate (Class XII)	Shri Ram Public School	87.00 %
2019	Matriculate (Class X)	Praxis Vidyapeeth	83.33 %

Internships

Full Stack SDE Internship | HopDesk Technologies July 2025 - September 2025

- Worked on Alt Magic Site to improve its functionality.
- Developed Shopify embedded app using Remix framework and Shopify app libraries to automatically generate AI-powered alt text for product images using Gemini APIs.
- Built full-stack React components with Shopify Polaris UI and App Bridge integration for seamless merchant experience within Shopify admin interface
- Implemented comprehensive API integration using REST and GraphQL to manage store data, user authentication, settings updates, and API key management
- Solved complex technical challenges including GraphQL authentication issues, access token troubleshooting.

Projects

Custom Input-Box Everywhere Extension | GDSC,IIT Roorkee June 2025 - July 2025

- Built a Firefox extension to improve typing UX by allowing input boxes to appear at eye-level as overlays or popups. Implemented Habit Mode to mirror keystrokes from an overlay into focused input fields in real-time.
- Designed Advanced Mode leveraging the Gemini API to modify webpage CSS dynamically, summarize text, and enhance usability.
- Added a feature to auto-analyze webpages and generate 5 smart UX prompt suggestions, enabling one-click application of AI-driven CSS changes. Integrated keyboard shortcuts for seamless toggling between modes and quick access to suggestions.

Imagify | IIT Roorkee May 2025 - June 2025

- Built an AI SaaS platform for text-to-image generation using the ClipDrop API, designed with a scalable MERN architecture and secure REST APIs.
- Implemented a credit-based system where users spend credits to generate images and purchase additional credits via Razorpay-integrated payments.
- Developed authentication and account management with user profiles, credit balance, and transaction history stored in MongoDB, ensuring security and reliability.
- Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS,ClipDropAPI

Hospital Management System | IIT Roorkee May 2025 - June 2025

- Implemented a hospital management platform with multi-level authentication (Patient/Doctor/Admin) to streamline scheduling, earnings tracking, and overall hospital operations.
- Developed patient-side features for doctor search, appointment booking, booking management, and secure online payments,
- while building responsive REST APIs to ensure scalability, security, and smooth performance.
- Built doctor and admin dashboards for managing appointments, tracking earnings, updating profiles, and monitoring hospital activities with a responsive UI optimized for all devices.

Skills

Computer languages C++ , HTML, Java Script
Software Packages ReactJS, Polaris, App Bridge, Remix, Express, MongoDB
Languages Known Hindi(SRW), English(SRW)
